COMPANY PROFILE

Fatmoh Ghana Limited (**FGL**) was created from the vision of successful engineer Abdul Fatawu Mohammed who has more than 25 years of experience in the Welding and fabrication industry.

The company is specialised in tank productions, construction of bulk plant, having more than 23 years' successful market experience. We carry out professional project planning and designing of the unit, produce the basic equipment (vertical and horizontal tanks, road tankers, self bunded tanks, flat beds trailers, low bed trailers), and provide construction and assembling works, as well as repair and operation service of the tank farms, tanker trailers and other related projects.

Our customers – GOIL, SHELL, TOTAL, NAAGAMNI OIL, JK HORGLY TRASNPORT COMPANY LIMITED, PETROSOL, STAR OIL, QUANTUM PETROLEUM, PETROLAND etc. mainly represented by petrochemical industrial enterprises demanding the highest standards of quality, safety and legitimacy of all operation processes.

Our tanker trailers and other products operates throughout Ghana Burkina Faso, Niger, Mali and other West African countries. The territory of construction and assembling works is also much, as our teams are usually busy at 3 – 5 construction sites throughout the country at the same time.

Over the last years we have been continuously investing in Morden management and development technologies. We have made the company a client-oriented one, we create a web resource providing the full range of expert technical information for the branch specialists.

ORGANIZATION STRUCTURE INCLUDES

ENGINEERING DESIGN DEPARTMENT:

IT offers the engineering design of the tanker trailers, tank farms, and storage plants – creating project plans for construction of new sites as well as reconstruction of the ones already in operation.

Our main distinctive feature is to be seen in keeping our approach close to practice. As our company producing the basic tank farm equipment itself. Our specialists are well informed and experienced in choosing the really effective type of equipment, technologies that have proved to be appropriate in the right working condition, as well as avoiding difficulties at the stages of construction and the following operation of the unit.

TANK PRODUCTION ENTERPRISE:

OUR TANK MANUFACTURING SITE IS FULLY EQUIPED FOR PRODUCTION OF:

Fatmoh Ghana Limited

VERTICAL AND HORIZONTAL STEEL TANKS, ROAD TANKERS: of smaller to larger loading capacity produced by either coiling or plate by plate method. Coiling machine and automatic flux core, MIG and SMAW welding are used in the course of production.

HORIZONTAL STEEL TANKS: storage tank production process is semi-automatically operated with the use of columned welding keys and Lincoln electric welding equipment which ensures ideal quality of welding joints.

ROAD TANKERS: Fatmoh tankers, develops and manufactures specialised tank container and road tanker equipment base on its patented advanced composite materials technology. Our core focus is innovating better ways to move and store dangerous and difficult liquids reducing the environmental impact on society.

CONSTRUCTION AND ASSEMBLING DEPARTMENT

Our construction and assembling department offers professional vertical tank installation, assembling pipe lines, corrosion preventive procedures for metal frame works, general construction works.

Construction and assembling management team has been developing for more than 7 years, gradually increasing the number of engineers and technical specialists, welding and assembling operators, the range of construction machines, making up a full set of Morden welding equipment and instruments, expanding the department of technical support service and technological control.
